### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claimed invention is drawn to the following:

**1. (Currently Amended) A heat-sensitive lithographic printing plate precursor comprising a support having a hydrophilic surface and an oleophilic coating provided on the hydrophilic surface, said coating comprising**  
**an infrared light absorbing agent, and**  
**a polymer which comprises a phenolic monomeric unit, wherein the phenyl group of the phenolic monomeric unit is substituted by a group having the structure -N=N-Q, wherein the -N=N- group is covalently bound to a carbon atom of the phenyl group, and wherein Q is an aromatic group.**

and a method for increasing the chemical resistance of a coating of a positive working heat-sensitive lithographic printing plate precursor.

None of the prior art references of record disclose or anticipate the recited heat-sensitive lithographic printing plate precursor wherein a polymer comprising a phenolic monomeric unit resin is modified with an organic substituent comprising a group as seen in claim 1. The proper terminal disclaimer removes the obviousness-type double patenting rejection over 10/834,555.

Because all the double patenting rejection have been overcome and the none of the prior art references disclose the recited heat-sensitive lithographic printing plate precursor as now recited or disclose a method for increasing the chemical resistance of a coating of a positive working heat-sensitive lithographic printing plate precursor, claims 1-15, 17, and 19-60 are seen as allowable and passed to issue.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
